## Preface

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990. A nationally representative annual sample of about 16,000 housing units have been selected for the survey in 2001. The present report, which is the forty sixth in the series, is based on a sample of 4000 housing units and gives national estimates with a stipulated standard error of labour force characteristics as reported in the reference period of the third quarter of 2001. The survey could not be conducted in areas of Northern and Eastern provinces due to the disturbed situation.

Planning and the execution of the survey was done by the staff of the Sample Survey Division under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys) and under the supervision of Messers. J.A.P. Balasuriya and M.A.N. Fernando, and Mrs. E.A.G. Perera, Senior Statisticians.

The computer data processing was done by Mrs. W.A.S.M.P. Gunasekara and Mrs. Chitra Nakandala, Statistical Officers, of Sample Survey Division, under the direction of Mrs. Dharma Dissanayaka, Senior Statistician and under the supervision of Mr. P.A. Subawickrama, Statistician using Micro Computers.

This publication was organized and prepared by Mr. J.A.P. Balasuriya, Senior Statistician under the direction of Mr. G.Y.L. Fernando, Director (Sample Surveys).

The Data Processing Division under the direction of Mrs. S.V. Nanayakkara, Director (Data Processing) and under the supervision of Mr. W. Sumanasiri, Deputy Director and Mr. Migara Fernando, Systems Analyst/Programmer was responsible for the survey data entry and preparation of computer edit programmes and final tabulation programmes.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Senior Statisticians/ Statisticians and field Statistical Officers, all who worked hard at the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division under the direction of Mr. C.N. Galahitiyawa, Deputy Director.

Finally, I wish to express my appreciation to all the respondents of the survey for their co-operation.

A.G.W. Nanayakkara

## 1 INTRODUCTION

The field work of the survey in the third quarter of 2001 was done in July and August 2001 and the current labour force status of persons was measured as in the reference weeks of July and August 2001. The estimates described in the following sections will not cover the Northern and the Eastern Provinces in its national level estimates and the survey covers only the persons living in housing units and it excludes the institutional population.

This survey was not conducted in the second quarter of 2001 owing to the heavy work involvement of the department staff in the Census of population and Housing.

Data gathered at the Census of Population & Housing have been used for under coverage adjustment of the survey data, commencing third quarter 2001.

## 2. Working Age Population (age 10 years & over)

- ◆ The survey estimated a total of 16.3 million persons as being the population of Sri Lanka (excluding the Northern & Eastern provinces) during the survey period.
- ◆ Out of this total nearly 85% persons were in the working age group. (10 yrs and over)
- ◆ The overall sex ratio is below hundred (96.3%) which implies that there are more females than males living in Sri Lanka.
- ◆ The sex ratio of the working age population is 95.4 percent.

## 3. Economically Active Population

- ◆ Out of every 100 persons in the working age, 48.3 persons are economically active.
- ◆ The survey reported that the labour force participation rate is gradually increasing with the increase of level of education of the working age population and it is highest among persons with G.C.E.(A/L) and above.
- ◆ It is observed that the male participation is higher than female participation in all levels of education.

- ◆ Although the participation rate is highest among the persons having the highest level of education, a majority (over 45 percent) of the persons in the labour force have attained a level of education between grades 5 to 9 only.

- ◆ The highest proportion of participation is reported in grade 5 to 9 for both sectors. It is 39.6 percent for urban sector and 46.6 percent for rural sector.

Table (i) - Distribution of population by age & sex

Age (in years)	Total	Male	Female
All age groups	100.0	100.0	100.0
0 - 9	14.7	15.1	14.3
10 - 14	9.4	10.0	8.8
15 - 19	10.7	11.0	10.4
20 - 24	8.9	8.8	9.0
25 - 29	7.4	7.5	7.2
30 - 39	14.1	13.4	14.7
40 - 49	13.6	13.3	13.9

G.C.E.(A/L) & above	14.0	11.6	18.7

## 4. Employed Population

- ◆ The survey estimated a total of 6.2 million persons as employed during the survey period.
- ◆ Of the employed persons 4.22 million (or 68.7 percent) are males and 1.98 million (or 31.3 percent) are females.
- ◆ The highest proportion of the employed person is reported at the level of education group Gr.5 to 9. The same pattern can be observed for both sexes.

Fig 1 - Percentage distribution of employed persons by level of education

- ◆ Nearly one third (33.9%) of the employed females have completed G.C.E.(O/L) or above. The corresponding proportion for males is 29.3 percent
- ◆ Nearly one fifth (20.9%) of the employed females work as unpaid family workers. It is only 4.9 percent among males.

25 - 29	10.8	6.9	18.7
30 - 39	3.0	1.5	6.2
40 & over	1.0	0.8	1.4

## 5. Unemployed Population

- ◆ The unemployment rate is estimated at 7.8 percent in the third quarter of 2001.
- ◆ It is observed that the incidence of unemployment is higher among those in the ages 15 to 24 and lower in older age groups.

### 5.1 Unemployment by level of education

- ◆ More than half of the unemployed persons (55.3%) have attained education qualifications equivalent to G.C.E.(O/L) or above.
- ◆ The proportion of unemployed females with educational attainment G.C.E.(O/L) & above is considerably higher as compared with males. (46.7 percent for males and 64.4 for females)
- ◆ The highest proportion of unemployed persons is recorded in the level of education group, grade 5 – 9, in both sectors (Urban, Rural)

**Table (ix) - Unemployed population by level of education & sex**

G.C.E.(A/L) & above	28.3	28.4	28.3

## 5.2 Unemployment among youths (age 20– 29)

- ◆ It is observed that the proportion of unemployed youths is more than fifty percent of the total unemployed persons.
- ◆ It gradually increased over the years.
- ◆ The highest proportion of unemployed youths (66.5%) is recorded in first quarter and third quarter of year 2000.
- ◆ The lowest unemployment rate among the youth (11.0%) for male is recorded in the fourth quarter of year 2000. The lowest rate for females is recorded in the second quarter of year 2000. (20.4 percent)

Figure 5 – Changing pattern of youth (age 20 – 29 yrs.) unemployment rate over the years

2000 4	15.8	11.0	24.6
2001 1	18.1	13.3	27.4
2001 3	17.9	13.6	25.6

## 6. Statistical significance of the difference between the estimated unemployment rate of the third quarter of 2001 and the estimated average annual rates of year 2000 and year 1999 respectively.

- ◆ Estimated value of the unemployment rate in third quarter of year 2001 = 0.078
- ◆ Estimated value of the unemployment rate in year 2000 = 0.076

The difference between the above estimated values is **not statistically significant** at 5 percent level of significance (two tail test)

- ◆ Estimated value of the unemployment rate in third quarter of year 2001 = 0.078
- ◆ Estimated value of the unemployment rate in year 1999 = 0.089

The difference between the above estimated values is **statistically significant** at 5 percent level of significance (two tail test)

## Appendix - 1

### Technical Notes

#### A. Introduction

The data is derived from household interviews obtained from a sample of the population 10 years of age and older. The survey is conducted quarterly by the Department of Census & Statistics and provides comprehensive data on the Labour Force, the Employed, the Unemployed and includes such characteristics as age, sex, occupation, and industry attachment. The survey also provides information on hours worked, and reasons for unemployment and nonparticipation in the labour force. The survey is conducted by trained interviewers from a total annual sample of about 16000 household. The data collected are based on the respondent's activity or status during the preceding week and previous 12 months period.

#### B. Collection and Coverage

Data are collected quarterly during a similar time period in each quarter through a scientifically selected sample designed to represent the non-institutional household population. About 4000 households are visited each quarter. Respondents are interviewed to obtain information about each member of the household, 10 years of age or older. The inquiry relates to the pervious calendar week of the interview to obtain "current" information, and to the previous 12 calendar months to obtain "usual" activity information.

Inmates of institutions, military camps, and are not surveyed.

#### C. Concepts and Definitions :

The concepts and definitions underlying the labour force data from this survey differ somewhat from those in previous labour force surveys. Therefore comparisons of data should be made carefully taking into account the concepts and definitions that follow:

**Labour Force :** The Labour Force is composed of the economically active population aged 10 years and over.

**Economically Active Population :** The economically active population is defined as those persons who are/were employed or unemployed during the reference period of the survey.

**Employed :** Employed persons are all household members who during the reference period worked as paid employees, employers, own account workers (self-employed) or unpaid family workers, in family enterprises. Also included are persons who had a job but were temporarily absent from work because of such things as vacation, illness, bad weather, and labour management disputes etc. It should be noted that if a person has one or more jobs, that person is counted only once.

**Unemployed :** Persons who were available and/or looking for work, and had no employment during the reference period, are considered to be unemployed.

**Reference Period :** In this survey there are two reference periods, "current" and "usual". The "current" reference period is the week preceding the week of data collection, i.e. last week.

The "usual" reference period is the preceding 12 months , i.e., the past 12 months.

**Currently Economically Active :** A person who was employed or unemployed is considered to be currently economically active.

**Usually Economically Active :** A person whose major activity during the past 12 months was employment and/or unemployed is considered to have been usually economically active. Twenty - six weeks or more is the measure that determines the major activity of the respondent for the year.

**Currently Employed :** A person who works for pay, profit, or unpaid family gain for one (1) hour or more during the past week is considered to have been employed during that period. This includes persons whether paid or not, with a job but not at work for the various cited above.

**Usually Employed :** A person whose major economic activity during the past 12 months was employment is considered to have been usually employed.

**Currently Unemployed :** A person who did no work but who was looking or available for work during the past week is considered to have been currently unemployed.

**Not in Labour Force (Not Economically Active) :** Persons who were neither working not available / looking for work are classified as not in the labour force. This group includes persons engaged in own house work, going to school, unable to work because of long term infirmities, retired, and others. Others include persons voluntarily idle.

## MEASURES OF THE LABOUR FORCE :

**The working age population** is the total non-institutional household population aged 10 years or over.

**The participation rate** is the proportion of the labour force that is in the working age population.

**The labour force** is the number of persons classified as employed or unemployed according to the criterion described above.

**The unemployed rate** represents the number of unemployed persons as a percent of the labour force.

These measures can be computed for age, sex, educational attainment and other personal or economic characteristics.

**Occupation, Industry and Employment Status :** These apply to the job held by the currently employed during the survey week. For persons with more than one job, it is usually the main job that is described. However, classifications are also made for the secondary job. Occupations are classified according to the International Standard Classification of Occupations (ISCO), ILO, 1988. Industry is classified according to ILO's International Standard Industrial Classification. The employment - status classification specifies employment in the public or private sectors, and further breaks down into employees (wage and salary workers), employers, own account workers (self-employed), and unpaid family workers.

**Hours of Work** refer to hours actually worked during the week. If the hours actually worked are less than the hours usually worked, respondents are asked the reasons for working fewer hours, which include the following: illness or injury, strike, vacation, reduction in economic activity, off season inactivity, bad weather, mechanical or electrical failure, and shortage of raw materials.

**A Household** consists of all persons, related or not, who occupy a housing unit, which covers a house, an apartment, a group of rooms when occupied as separate living quarters. Domestic servants, Boarders, and lodgers who live and have their meals or share other essentials of living with the family are also related as members of the household. Persons, who usually live here but are temporary away are included as members of the household, but persons who have usual residence elsewhere, but are present at the time of the interview, are excluded.

**Geographic Data :** Data is available at national and provincial levels, and further broken down by urban and rural categories. URBAN areas are those that have an administrative structure of a Municipal Council, an Urban Council. Rural areas are those not classified as urban.

#### D. SAMPLE DESIGN

The Survey is conducted quarterly to produce estimates of employment, unemployment, labour force participation and basic demographic characteristics. The scope of coverage includes all households in Sri Lanka.

The list of housing units created for Demographic Survey 1994 were taken as sample frame. Sample lists were selected from the above frame taken as primary Sampling Units (PSU). A systematic Sample of 15 housing units per PSU was selected on final sampling units.

The total annual sample size is 15915 housing units, distributed as 265 PSUs per each quarter and 15 housing units (SSUs) per PSU. The allocation to the domains aims at ensuring approximately equal levels of reliability from domain to domain.

The 1,061 PSUs were selected by systematic Sampling from the PSUs created for Demographic Survey - 1994. A listing operation was conducted in each selected PSU to provide a frame for the second stage of selection. The selection of housing units within PSU was systematic with random start.

**CONCEPTS & DEFINITIONS**

1. **Labour Force** : The labour force is composed of the economically active population 10 years of age and over.
2. **The Economically Active Population** : is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. **Employed** : Persons , who during the reference period, worked as paid employees, employers, own account workers (self employed) , or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. **Unemployed**: Persons available and/or looking for work, and who did no work, during the reference period are said to be unemployed.
5. **Reference period** : In this survey there are two (2) reference periods, "current" and "usual" . The "current" reference period is the week preceding the week of the survey, i.e., last week. The "usual" reference period is the preceding 12 months, i.e., the past 12 months.
6. **Currently Economically Active** : A person who was employed or unemployed during the current reference period is considered to be currently economically active.
7. **Usually Economically Active** : A person whose major activity during the past 12 months was employment and/or unemployment is considered to have been usually economically active.
8. **Currently Employed** : A person who worked for pay, profit, or unpaid family gain for one (1) hour or more during the past week is said to be currently employed.
9. **Usually Employed** : A person whose major economic activity during past 12 months was employment is said to have been usually employed.
10. **Currently Unemployed** : A person who did no work but was looking for work during the past 4 weeks is said to be currently unemployed.
11. **Usually Unemployed** : A person who was looking or available for work during the major part of the past 12 months is said to have been usually unemployed.
12. **Not in the Labour Force (not economically active)** : Persons who were neither working nor available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full - time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and usual definitions apply.
