## Preface

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990. A nationally representative annual sample of about 16,000 housing units have been selected for the survey in 1998. The present report, which is the thirty fourth in the series, is based on a sample of 4000 housing units (excluding Northern and Eastern provinces) and gives national estimates with a stipulated standard error of labour force characteristics as reported in the reference period of the second quarter of 1998.

Planning and the execution of the survey was done by the staff of the Sample Survey Division under the guidance of Mrs. S. Vidyaratne, Additional Director and the direction of Mr. G.Y.L. Fernando, Deputy Director and under the supervision of Mr. J.A.P. Balasuriya, Statistician.

The computer data processing was done by Mr. P.A. Subawickrama, Statistical Officer and Miss W.A.S.M.P. Gunasekara, Statistical Investigator of Sample Survey Division, under the supervision of Mr. J.A.P. Balasuriya, Statistician, using Micro Computers.

This publication was organized and prepared by Mrs. Dharma Dissanayaka, Statistical Officer under the direction of Mr. G.Y.L. Fernando, Deputy Director and under the supervision of Mr. J.A.P. Balasuriya, Statistician.

The Data Processing Division under the direction of Mrs. S.V. Nanayakkara, Deputy Director (in charge) and under the supervision of Mr. W. Sumanasiri, Deputy Director and Mr. Migara Fernando, Systems Analyst/Programmer was responsible for the survey data entry and preparation of computer edit programmes and final tabulation programmes.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Statisticians, Statistical Officers and Statistical Investigators, all who worked hard in the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division under the direction of Mr. K.D. Siripala, Deputy Director.

Finally, I wish to express my appreciation to all the respondents of the survey for their co-operation.

## 1 INTRODUCTION

The field work of the survey in the second quarter of 1998 was done in April and May 1998 and the current labour force status of persons was measured as in the reference weeks of April and May 1998. The estimates described in the following sections will exclude the Northern and the Eastern Provinces in its national level estimates and the survey covers only the persons living in housing units and it excludes the institutional population.

## 2. Economically Active Population

- The economically active population in Sri Lanka is estimated at 6.57 million. Of this number 5.95 million are employed and 0.62 million are unemployed.
- Of the persons aged 10 years and over, 51.0 percent is estimated to be economically active.
- A higher participation in the labour force is reported for males (67.7 percent) as compared to females (34.8 percent).
- The highest participation rate can be seen for females and males in the age group 35-39 years.

## Appendix - 1

## Technical Notes

**A. Introduction**

The data is derived from household interviews obtained from a sample of the population 10 years of age and older. The survey is conducted quarterly by the Department of Census & Statistics and provides comprehensive data on the Labour Force, the Employed, the Unemployed and includes such characteristics as age, sex, occupation, and industry attachment. The survey also provides information on hours worked, and reasons for unemployment and nonparticipation in the labour force. The survey is conducted by trained interviewers from a total annual sample of about 16000 household. The data collected are based on the respondent's activity or status during the preceding week and previous 12 months period.

**B. Collection and Coverage**

Data are collected quarterly during a similar time period in each quarter through a scientifically selected sample designed to represent the non-institutional household population. About 4000 households are visited each quarter. Respondents are interviewed to obtain information about each member of the household, 10 years of age or older. The inquiry relates to the pervious calendar week of the interview to obtain "current" information, and to the previous 12 calendar months to obtain "usual" activity information.

Inmates of institutions, military camps, and are not surveyed.

**C. Concepts and Definitions :**

The concepts and definitions underlying the labour force data from this survey differ somewhat from those in previous labour force surveys. Therefore comparisons of data should be made carefully taking into account the concepts and definitions that follow:

**Labour Force :** The Labour Force is composed of the economically active population aged 10 years and over.

**Economically Active Population :** The economically active population is defined as those persons who are/were employed or unemployed during the reference period of the survey.

**Employed :** Employed persons are all household members who during the reference period worked as paid employees, employers, own account workers (self-employed) or unpaid family workers, in family enterprises. Also included are persons who had a job but were temporarily absent from work because of such things as vacation, illness, bad weather, and labour management disputes etc. It should be noted that if a person has one or more jobs, that person is counted only once.

**Unemployed :** Persons who were available and/or looking for work, and had no employment during the reference period, are considered to be unemployed.

**Reference Period :** In this survey there are two reference periods, "current" and "usual". The "current" reference period is the week preceding the week of data collection, i.e. last week.

The "usual" reference period is the preceding 12 months ,i.e., the past 12 months.

**Currently Economically Active :** A person who was employed or unemployed is considered to be currently economically active.

**Usually Economically Active :** A person whose major activity during the past 12 months was employment and/or unemployed is considered to have been usually economically active. Twenty - six weeks or more is the measure that determines the major activity of the respondent for the year.

**Currently Employed :** A person who works for pay, profit, or unpaid family gain for one (1) hour or more during the past week is considered to have been employed during that period. This includes persons whether paid or not, with a job but not at work for the various cited above.

**Usually Employed :** A person whose major economic activity during the past 12 months was employment is considered to have been usually employed.

**Currently Unemployed :** A person who did no work but who was looking or available for work during the past week is considered to have been currently unemployed.

**Not in Labour Force (Not Economically Active) :** Persons who were neither working nor available / looking for work are classified as not in the labour force. This group includes persons engaged in own house work, going to school, unable to work because of long term infirmities, retired, and others. Others include persons voluntarily idle.

## MEASURES OF THE LABOUR FORCE :

**The working age population** is the total non-institutional household population aged 10 years or over.

**The participation rate** is the proportion of the labour force that is in the working age population.

**The labour force** is the number of persons classified as employed or unemployed according to the criterion described above.

**The unemployed rate** represents the number of unemployed persons as a percent of the labour force.

These measures can be computed for age, sex, educational attainment and other personal or economic characteristics.

**Occupation, Industry and Employment Status :** These apply to the job held by the currently employed during the survey week. For persons with more than one job, it is usually the main job that is described. However, classifications are also made for the secondary job. Occupations are classified according to the International Standard Classification of Occupations (ISCO), ILO, 1988. Industry is classified according to ILO's International Standard Industrial Classification. The employment - status classification specifies employment in the public or private sectors, and further breaks down into employees (wage and salary workers), employers, own account workers (self-employed), and unpaid family workers.

**Hours of Work** refer to hours actually worked during the week. If the hours actually worked are less than the hours usually worked, respondents are asked the reasons for working fewer hours, which include the following: illness or injury, strike, vacation, reduction in economic activity, off season inactivity, bad weather, mechanical or electrical failure, and shortage of raw materials.

**A Household** consists of all persons, related or not, who occupy a housing unit, which covers a house, an apartment, a group of rooms when occupied as separate living quarters. Domestic servants, Boarders, and lodgers who live and have their meals or share other essentials, of living with the family are also related as members of the household. Persons, who usually live here but are temporary away are included as members of the household, but persons who have usual residence elsewhere, but are present at the time of the interview, are excluded.

**Geographic Data :** Data is available at national and provincial levels, and further broken down by urban and rural categories. URBAN areas are those that have an administrative structure of a Municipal Council, an Urban Council. Rural areas are those not classified as urban.

#### **D. SAMPLE DESIGN**

The Survey is conducted quarterly to produce estimates of employment, unemployment, labour force participation and basic demographic characteristics. The scope of coverage includes all households in Sri Lanka.

The list of housing units created for Demographic Survey 1994 were taken as sample frame. Sample lists were selected from the above frame taken as primary Sampling Units (PSU). A systematic Sample of 15 housing units per PSU was selected on final sampling units.

The total annual sample size is 15915 housing units, distributed as 265 PSUs per each quarter and 15 housing units (SSUs) per PSU. The allocation to the domains aims at ensuring approximately equal levels of reliability from domain to domain.

The 1,061 PSUs were selected by systematic Sampling from the PSUs created for Demographic Survey - 1994. A listing operation was conducted in each selected PSU to provide a frame for the second stage of selection. The selection of housing units within PSU was systematic with random start.

**Confidential**  
The information collected in this survey will be strictly confidential and individual level information will not be divulged to any person or agency.

**CONCEPTS & DEFINITIONS**

1. **Labour Force** : The labour force is composed of the economically active population 10 years of age and over.
2. **The Economically Active Population** : is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. **Employed** : Persons, who during the reference period, worked as paid employees, employers, own account workers (self employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. **Unemployed**: Persons available and/or looking for work, and who did no work, during the reference period are said to be unemployed.
5. **Reference period** : In this survey there are two (2) reference periods, "current" and "usual". The "current" reference period is the week preceding the week of the survey, i.e., last week. The "usual" reference period is the preceding 12 months, i.e., the past 12 months.
6. **Currently Economically Active** : A person who was employed or unemployed during the current reference period is considered to be currently economically active.
7. **Usually Economically Active** : A person whose major activity during the past 12 months was employment and/or unemployment is considered to have been usually economically active.
8. **Currently Employed** : A person who worked for pay, profit, or unpaid family gain for one (1) hour or more during the past week is said to be currently employed.
9. **Usually Employed** : A person whose major economic activity during past 12 months was employment is said to have been usually employed.
10. **Currently Unemployed** : A person who did no work but was looking for work during the past 4 weeks is said to be currently unemployed.
11. **Usually Unemployed** : A person who was looking or available for work during the major part of the past 12 months is said to have been usually unemployed.
12. **Not in the Labour Force (not economically active)** : Persons who were neither working nor available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full - time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and usual definitions apply.
